RE: Site Inspection, Thomas J. Clark's Daddy Dearest Mine, S/015/046, Emery County, Utah

Date of Inspection: July 27, 1995  
Time of Inspection: 09:25 - 09:45  
Conditions: Warm and clear  
Participants: Neil Simmons, BLM, San Rafael Resource Area; Tony Gallegos, DOGM

Purpose of Inspection: To become familiar with the site.

This site is located near two other mine sites operated by Clarks. The other two sites are the Miller Rock mine by Bret Clark (Hub Research) and the Emeryide mine operated by Robert Clark. No one was at the Daddy Dearest site during the time of this inspection. Photographs were taken from the bluff overlooking the site to document the current status. There is a main excavation area and then an access road leading to a new portal area. The portal has not been constructed yet.

There are a number of large sandstone boulders in the waste pile which, at some time in the past, have rolled down onto the paved road below the mine site. There are a number of old or abandoned vehicles on site and some minor amounts of scrap metal or motor parts.

During this inspection the mine sites to the south were active.
